SUMMARY

Frontend Engineer with 4+ years of experience in **React** and **TypeScript**. At Sonnen (a Shell subsidiary) I own production features end to end, drive frontend **architecture** decisions with product, and build reusable **component libraries** for our **design system**. I built a user impersonation system adopted across all company apps, cut load time by ~10s (performance score 52→83) and raised unit test coverage from 70% to 89%.

EXPERIENCE

Sonnen GmbH (Shell subsidiary) — Frontend Engineer — Apr 2025 – Present

- Own end-to-end delivery of production **React**/**TypeScript** features - **architecture**, implementation, testing, and accessibility.
- Drive frontend **architecture** and technical decisions with product and stakeholders, translating business requirements into technical designs.
- Built reusable **component libraries**, contributed to the **design system**, added Sentry for observability, and maintained analytics/consent tooling (GTM, GA4, Usercentrics) with LaunchDarkly feature flags and AWS-hosted web assets.
- Built and owned core cross-app features, including a user impersonation system adopted across all company applications for support and QA workflows.
- Cut application load time by ~10s and raised the performance score from 52 to 83 (and counting).
- Improved SEO score from 50 to 100 and raised unit test coverage from 70% to 89%.
- Built and maintained CI/CD pipelines and automated workflows using GitHub Actions.
- Led accessibility work (semantic HTML, ARIA, screen-reader testing) toward WCAG 2.x AA compliance.
- Single-handedly migrated the department's 7+ web applications to AWS Chromosphere, with the infrastructure (S3 + CloudFront) managed as Terraform code, with no supervision or outside support.
- Led the frontend migration of 10 country corporate sites to Webflow, integrating GTM, GA4, reCAPTCHA, and Zapier/Salesforce lead-flow automation.
- Ran code reviews, onboarded engineers, and maintained technical documentation.

Purafi (Remote) — Frontend Developer — Oct 2024 – Mar 2025

- Built responsive, scalable **React** UI for the MVP, working closely with backend engineers, designers, and the Product Owner.

Inframodern (Remote) — React Native Developer — Feb 2024 – Sep 2024

- Built and maintained a **React** Native mobile app in collaboration with backend developers and the team lead.

Remote Web Team — Frontend Developer — Jul 2023 – Jan 2024

- Built responsive client websites in collaboration with backend developers and designers.

Mahaseel Masr — Frontend Developer Trainee — Apr 2023 – Jun 2023

- Built **React**.js interfaces with Material UI; used Redux Toolkit, Formik/Yup, and Chart.js for dashboards and forms.

Freelance — Frontend Developer — Jan 2021 – Nov 2022

- Delivered multiple frontend projects using HTML, CSS, JavaScript, Bootstrap, and **React**.
